

BUSINESS REQUIREMENTS DOCUMENT

Hospital Employee Tracker (HF Software)

HR & Workforce Management Platform

Document Version	1.0
Prepared By	Business Analysis Team
Date	April 2026
Status	Draft – For Review
Document Type	Business Requirements Document (BRD)

CONFIDENTIAL — FOR INTERNAL USE ONLY

1. Document Overview

1.1 Purpose

This Business Requirements Document (BRD) describes the functional and non-functional requirements for the Hospital Employee Tracker – a comprehensive HR and workforce management platform (HF Software) built specifically for hospital and healthcare organisations. The document serves as the authoritative reference for design, development, testing, and stakeholder sign-off.

1.2 Scope

The system covers the complete employee lifecycle within a hospital environment – from daily attendance tracking and leave management to payroll submissions, profile maintenance, and resignation processing. The platform will be accessible via a secure web-based interface with role-based access controls for employees, managers, and HR administrators.

1.3 Document Information

Project Name	Hospital Employee Tracker (HF Software)
Document ID	BRD-HF-2026-001
Version	1.0 – Initial Draft
Prepared By	Business Analysis Team
Reviewed By	HR Head / IT Manager
Approved By	Project Sponsor
Effective Date	April 2026
Classification	Confidential – Internal Use Only

1.4 Definitions & Acronyms

Term / Acronym	Definition
BRD	Business Requirements Document
HF	HF Software – the product brand
HRIS	Human Resource Information System
MFA	Multi-Factor Authentication
UAN	Universal Account Number (PF-related)

Term / Acronym	Definition
ESIC	Employees' State Insurance Corporation
OD	On Duty
WFH	Work From Home
DOJ	Date of Joining
PAN	Permanent Account Number

2. Stakeholders

Stakeholder	Role	Interest / Responsibility
Hospital Management	Project Sponsor	Approve requirements; fund the project
HR Department	Primary User	Manage employee records, leave, payroll
Department Managers	Approver	Approve attendance, leaves, resignations
Hospital Employees	End User	Submit requests, view payslips, self-service
IT / Development Team	Technical Owner	Build, deploy, and maintain the system
Finance / Payroll	Consumer	Receive processed payroll and tax data
Compliance / Legal	Auditor	Ensure statutory compliance (PF, ESIC, Tax)

3. Business Objectives

The Hospital Employee Tracker is commissioned to achieve the following strategic objectives:

- Digitise and centralise all HR operations across the hospital, eliminating paper-based processes.
- Provide real-time attendance visibility and reduce manual payroll errors.
- Empower employees with self-service capabilities – leave applications, document access, and profile updates.
- Ensure full statutory compliance with PF, ESIC, Income Tax (old & new regime), and other labour laws.
- Enable managers to make informed decisions through dashboards, visualisations, and approval workflows.
- Support organisational transparency through automated celebrations, leave visibility, and holiday management.

4. System Modules Overview

#	Module Name	Description
1	Authentication & Security	Login, MFA, password management
2	Employee Dashboard	Personalised home screen with key widgets
3	Employee Profile	Personal, communication, and education details
4	Attendance Management	Check-in/out, shift, calendar, regularisation
5	Leave Management	Leave types, requests, balances, approvals
6	Payroll & Tax Submission	Payslip history, IT planner, bank accounts
7	Documents	Nominee and personal document management
8	HR Corner	Resignation, requests, and HR communications
9	Notifications	Payslip alerts, approvals, system events
10	Reports & Filters	Configurable dashboard widgets and data exports

5. Functional Requirements

5.1 Authentication & Security

The system must support secure, multi-layered access for all user roles.

Req. ID	Requirement	Priority
AUTH-01	The system shall provide a login page with username/email and password fields.	High
AUTH-02	The system shall support Multi-Factor Authentication (MFA) for all users.	High
AUTH-03	Users shall be able to change passwords from the profile menu.	High
AUTH-04	The system shall provide a secure logout function accessible from the header.	High
AUTH-05	Session timeout shall log the user out automatically after inactivity.	Medium

5.2 Employee Dashboard

The dashboard is the default landing screen post-login. It provides a consolidated, real-time view of the employee's key data.

5.2.1 Header Bar

- Display employee profile picture (avatar or cartoon), employee code, role, work location, and reporting manager name.
- Show current date, running time, and day of the week.
- Display a notification area showing messages such as 'Payslip Generated' with amount credited.
- Provide a user menu with options: Change Password, MFA Settings, and Logout.

5.2.2 Welcome & Quick-Access Tiles

The dashboard shall display a personalised welcome greeting followed by up to five configurable quick-access tiles. A filter mechanism shall allow the employee to choose up to three tiles from the following options:

Tile	Linked Module	Description
Apply Leave	Leave Request Module	Shortcut to submit a new leave request
View Attendance	Attendance Module	Quick view of attendance records
Payment History	Payroll Module	Access to past payslips and payment records
My Documents	Documents Module	View nominee and personal documents

5.2.3 Attendance Summary Widget

- Display first check-in time and last check-out time for the current day.
- Show total working hours for the current day.
- Provide a check-in / check-out toggle button (on/off method).
- Visualise working days for the past 30 days.
- Show average hours per day and total working hours for the current month.

5.2.4 Leave Overview Widget

A visual representation (e.g. donut / bar chart) of leave balances must be displayed for the following leave types:

Leave Type	Display
Privilege Leave	Remaining days
Sick Leave	Remaining days
Casual Leave	Remaining days
Bereavement Leave	Remaining days
Paternity Leave	Remaining days
Optional Leave	Remaining days
Work From Home (WFH)	Remaining days
On Duty (OD)	Remaining days

5.2.5 Team Leave & Celebrations Widget

- Display team members currently on leave.
- Show upcoming employee birthdays and work anniversaries with employee names visible to all staff.
- Display a holiday calendar showing all company holidays for the current year, organised month-wise with dates and descriptions.
- Show recent leave requests submitted by the logged-in employee.

5.3 Employee Profile

The profile module provides a read-only summary view and an editable full-profile form, organised across three sub-sections.

5.3.1 Profile Summary (Read-Only Header)

- Display: Employee Full Name, Employee Code, and Date of Joining (DOJ).
- A Save button shall be enabled only when changes are made.

5.3.2 General Information

Field	Type	Notes
Profile Picture	Upload	Avatar or photograph upload
Full Name	Text	Editable
Mobile Number	Text	Primary contact number
Gender	Dropdown	Male / Female / Other
Personal Email	Email	
Official Email	Email	Read-only / HR-set
Date of Birth	Date	As per Aadhaar
Father's Name	Text	
Blood Group	Dropdown	
Aadhaar Number	Text	Masked display
PAN Number	Text	Masked display
UAN	Text	PF Universal Account Number
ESIC Number	Text	
PF Number	Text	
Is Differently Abled	Toggle	Yes / No

5.3.3 Communication Details

- Emergency contact number and emergency contact person name.
- Option: Permanent address same as present address (auto-fill toggle).
- Present address: Lines 1–3, Country (dropdown), State (dropdown), City, Pincode.
- Permanent address: Lines 1–3, Country (dropdown), State (dropdown), City, Pincode.

5.3.4 Education Details

- Add Education button to enter past education records.
- Fields: Graduation Type, Education Degree, Year of Passing, Scoring Value.

- Existing records displayed in a table with an Edit/Delete action column.

5.4 Attendance Management

The Attendance module provides complete daily tracking, shift management, calendar view, and leave/OD request workflows.

5.4.1 Attendance View & Shift

- Filter by Period From and Period To (date range selectors).
- Display a table with: Attendance Date, Shift Code, Shift Name, Start Time, End Time.
- A Shift Change Request button shall allow employees to request a shift modification.

5.4.2 Attendance Calendar

An editable calendar view shall colour-code attendance status using the following legend:

Status	Colour Indicator
Present	Green
Absent	Red
Week Off	Light Grey
Work on Week Off	Orange
Holiday	Blue
Permission	Yellow
Approved Leave / OD / WFH	Dark Green
Applied Leave / OD / WFH	Amber

5.4.3 Attendance Regularisation

Four workflow sections manage regularisation requests:

Section	Key Fields
Pending	Employee Name, Manager Name, Requested Date, Requested On, Status, Remarks, Cancel button
Approved	Above + Approved On, Approved By, Approver Remarks
Cancelled	Above + Cancelled On, Status, Remarks
Rejected	Above + Rejected On, Rejected By, Validator Remarks

All four sections shall include a Refresh button.

5.4.4 Requests (Permissions / OD / WFH)

- Filter by: Employee Code, Date Range, Status.
- Display table: Date, Requested On, Start Time, End Time, Requested Time, Manager Remarks, Status, Action.

- A Search Now button triggers filtered results; Refresh reloads the grid.

5.5 Leave Management

The leave module (accessible from the dashboard quick-link) handles all leave types with an approval workflow. Leave types managed: Privilege Leave, Sick Leave, Casual Leave, Compensatory Leave, Bereavement Leave, Optional Leave, WFH, Paternity Leave, and On Duty.

- Employees can apply for leave specifying type, dates, reason, and attachment.
- Managers receive a notification and can Approve or Reject with remarks.
- Leave balance is updated automatically after approval.
- Dashboard leave overview widget reflects real-time balances.

5.6 Payroll & Tax Submission

5.6.1 Payment History

- Employees can view a chronological list of all payslips.
- Each payslip record displays: Pay Period, Amount Credited, and a Download option.

5.6.2 Tax Planner (IT Submission)

The Tax Planner enables employees to declare investment savings for the financial year. The screen must display:

Field / Section	Description
Employee Info	Name, Code, Designation, Date of Birth, View Slip
Financial Year	Dropdown – current and past financial years
Tax Mode	Toggle: New Regime / Old Regime
Total Qualifying Amount	Auto-calculated from declarations
Total Invested Amount	Sum of declared investments
Preview Investment	Summary preview before final submission
My Tax Calculator	Interactive tool to estimate tax liability
Medi-Claim Deductions	Section 80D declarations
House Rent Allowance (HRA)	HRA calculation inputs
House Property	Interest on home loan, Section 24
Other Income	Any additional income declarations

5.6.3 Bank Account Management

Employees can manage multiple bank accounts. Display format includes:

- Employee name and code displayed at the top of the section.
- Fields: Bank Name, Account Number, IFSC Code, Is Default (toggle), Status (Approved / Not Approved).
- Action buttons: Edit and Download.
- Add Bank button to register a new account; Save button to persist changes.

5.7 Document Management

- Employees can upload, view, and download personal and nominee documents.
- Supported file formats: PDF, JPG, JPEG, PNG.
- Documents accessible from the 'My Documents' dashboard quick-link.

5.8 HR Corner & Resignation

The HR Corner provides self-service HR functions including access to company policies and the resignation submission workflow.

5.8.1 Resignation Submission

Field	Details
Employee Name	Auto-populated from profile
Employee Code	Auto-populated
Designation	Auto-populated
Department	Auto-populated
Date of Birth	Auto-populated
Notice Period	System-configured (e.g. 60 calendar days)
Last Working Date	Auto-calculated based on submission date + notice period
Reason(s)	Free-text or dropdown selection
Select Last Working Date	Date picker – subject to notice period policy
Remarks	Optional free-text
Upload Attachment	Supports PDF, JPG, JPEG, PNG – max size TBD
Submit Resignation	Final submission button with confirmation dialog

On submission, the system shall notify the employee's direct manager and HR department. The notice period calculation shall automatically determine the last working date based on the submission date.

6. Non-Functional Requirements

Category	Requirement
Performance	Dashboard and module pages shall load within 3 seconds on a standard broadband connection.
Security	All data in transit shall be encrypted using TLS 1.2 or higher. Sensitive fields (Aadhaar, PAN) shall be masked in the UI.
Availability	The system shall maintain 99.5% uptime (excluding scheduled maintenance windows).
Scalability	The platform shall support concurrent usage by all hospital employees without degradation.
Accessibility	The interface shall be responsive and compatible with modern browsers (Chrome, Edge, Firefox, Safari).
Audit Trail	All key actions (approvals, rejections, submissions, profile changes) shall be logged with timestamp and user identity.
Data Retention	Employee records shall be retained for a minimum of 7 years in line with statutory requirements.
Localisation	Date formats shall follow DD-MM-YYYY. Currency shall display in INR (₹).

7. Assumptions & Constraints

7.1 Assumptions

- Each hospital employee will have a unique Employee Code assigned by HR prior to system onboarding.
- A single reporting-manager hierarchy exists; multi-level approval chains are out of scope for v1.0.
- All statutory identifiers (PAN, Aadhaar, UAN, ESIC, PF) are already captured or will be collected during profile setup.
- Integration with a third-party payroll engine is a Phase 2 initiative; v1.0 covers display and submission only.
- Internet connectivity is available at all workstations used by employees.

7.2 Constraints

- The project must comply with the Information Technology Act, 2000 and applicable data protection regulations.
- Biometric hardware integration is out of scope for the initial release.
- Mobile application development is planned for Phase 2; v1.0 is a web-responsive application only.
- Password policies must meet a minimum of 8 characters with complexity requirements.

8. Risk Register

Risk ID	Risk Description	Likelihood	Impact	Mitigation
R-01	Incomplete employee data migration from legacy systems	Medium	High	Data cleansing exercise before go-live; dedicated migration UAT phase
R-02	Low user adoption due to change resistance	Medium	Medium	Training workshops; champion network; intuitive UI design
R-03	Data privacy breach or unauthorised access	Low	High	MFA enforcement; role-based access control; regular security audits
R-04	Statutory compliance changes (tax slabs, PF rules)	Medium	High	Configurable tax engine; dedicated compliance review cycle
R-05	Scope creep delaying go-live	High	Medium	Strict change control process; MoSCoW prioritisation

9. Document Approval & Sign-Off

By signing below, the stakeholders confirm that they have reviewed and accepted this Business Requirements Document as the baseline for development.

Name	Role	Signature	Date
	Project Sponsor		
	HR Head		
	IT Manager		
	Development Lead		
	QA Lead
